## Manage your e-Commerce site through your ERP

Reliable, full integration to your ERP
SAGE 50 or SAGE 200 ERP links

Whatever the size of your e-Commerce catalogue, the number of countries in which you sell products, or the number of currencies used for purchasing, you can automatically synchronise items, customers, stocks and orders between your e-Commerce site and your ERP.

You will achieve significant productivity gains by automating your administrative processes.

The reliability of our ERP Links frees up precious time - which you can dedicate to growing your business.

Do you use another ERP?
Connect via TALEND

Import articles and user profiles, export orders. Talend technology offers you concrete solutions for all your requirements.

Whatever your ERP or your IT system, Oxatis has a solution that allows you to connect 100% of your data to your e-Commerce site: update stock in real time, customer/lead data, pricing conditions, description pages for your products, and so on.

" Sage chose Oxatis as its exclusive e-Commerce solution. "

Testimonies
of success

" Our customers, contacts and product catalogue are all centralised in our accounting software thanks to the ERP link with our site. This solution is unique and saves us an incredible amount of time processing thousands of orders each month! "

Clive Davis | Founder and CEO of Premier Equine

" Our integrated ERP system eliminates the need for our staff to perform time consuming data-entry tasks. Data-duplication and entry-errors are a thing of the past. We reduced admin staff while tripling our sales revenue. "

Paul Smith | Founder and CEO of Hantex

" At each stage of the order process, from payment to preparation and dispatch, the customer and order information are updated in the customer account and synchronised with Sage. "

Max Commençal | Founder and CEO of Commencal

100% secure
integration

All data exchanges:
- ✓ Use SSL protocol
- ✓ Are performed as outgoing calls to ensure the security of your local network
